

Video Transcript: ^FOUO\_CV62\_Hull&Keel\_SeaFloor\_long\_Annotated3.avi

Time Stamp	Location	Major Fauna and Other Features
00:00	CV62 Hull (Near Bow)	Barnacles (Balanus), mussels (Mytilus), tube worms (Sabellidae)
00:29		Measure of fouling thickness near surface
00:58		Tube worms
01:07	CV62 Keel Frame 34	Tube worms (Sabellidae, Serpulidae), anomies ( <i>Metridium senile</i> ), tunicates ( <i>Ciona intestinalis</i> )
01:25		Air bubbles trapped under hull
01:45	Sea Floor	Tube worms (Serpulidae, Sabellidae)
02:09		Sample location (hole in sediment)
02:16		Crabs (Cancer), tube worms
02:45		Crabs
03:03		Crab, tubeworms, mussels
03:55		Tube worms, anomies
04:13		Mussels
04:24		Anomies
04:38		Large amount of debris
04:46		Crab
05:00		Tube worms, anomies
05:10		Tube worms, anomies

Video credits:

00:00 – 01:44 Seward Marine, Inc., recorded during hull surveys in November 2016

01:45-05:10 PSNS&IMF Divers, recorded during sediment sampling on March 30, 2017
